## **Selection Criteria/Justification –Furniture**

### **1. Planned Criteria**

#### **a. User Needs** (state their specific needs here):

The client will need a conference table in their office for private meetings in their office.

#### **b. Design Intent** (state justification):

This table was chosen because it has free leg space that will allow several users to be at the table for meetings. The height is a comfortable height for people to sit at.

### **2. Design**

“Antenna Y-base tables offer unobstructed knee space and advanced cable management in compact shapes designed for small workstations and meeting spaces. Y-base tables combine standard Antenna tops with a grommet centered over posts and integral wire management channel and a low-profile, three-spoke “Y” base or “bowtie” shape base.”

<https://www.knoll.com/product/antenna-y-base-tables?section=design>

### **3. Function/Performance/**

“Antenna Design’s imaginative user-centered approach to the workplace celebrates functional simplicity with honest materials and seamless technology integration.”

<https://www.knoll.com/document/1356578260874/KNL20-Cutsheet-AntennaWorkspaces-ProductOverview-200730.pdf>

### **4. Sustainability**

- Legs have 30-45% recycled content steel
- Adhesives and finishes are virtually VOC-free
- PVC-free
- Fiberglass-free

### **5. Service**
